SACRAMENTO
2005 JUL 31 PM 12:50

Source Name: **SOUTH FORK STANISLAUS RIVER**

Tributary To: **STANISLAUS RIVER**

County: **Tuolumne**

Year of First Use: **1856**

Diversion Within: **NW1/4 of SE1/4 Section 15, T04N, R18E, M3&M**

Parcel Number:

A. Water is Used Under: Riparian claim _____ Pre-1914 right ☒ Other (explain): _____

B. Year of First Use: (Please provide if missing above) _____

C. Amount of Use: Enter the amount (or the approximate amount) of water used each month, using the table below.
 End of Month Storage

Amounts below are in: Gallons				Million Gallons (MG)			Acre-feet (AF)			X	Other		
Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2003	5,329	4,658	7,011	11,440	18,134	18,370	17,897	18,927	12,531	6,893	3,523	4,088	
2004	3,779	3,442	10,142	18,880	18,324	17,728	16,703	14,961	11,429	7,943	8,157	4,852	
2005	4,859	4,724	5,429	10,735	17,572	18,069	17,758	15,600	11,595	7,437	4,867	9,999	

D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation ☒ _____ acres; Stockwatering _____; Domestic ☒ _____

Other (specify) **Electric generation at Spring gap, Stanislaus, and Phoenix Powerhouses**

E. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed.
 (New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water.

a. Are you now employing water conservation efforts? YES _____ NO ☒
 Describe any water conservation efforts you have initiated: _____

b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriation, please show the amount of water conserved.

Reduction in Diversions:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES _____ NO _____

The above discussion is provided for general information. For more detailed information concerning water rights, please contact the following persons or write to the other persons listed below. (1) Statewide water rights use (2) Information concerning water rights in California, and (3) Information concerning water rights in the United States.

There are two principal types of surface water rights in California. They are riparian and appropriative. A riparian right enables an owner of land bordering a natural body of water to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source and used by an adjoining parcel under the jurisdiction of the riparian owner. The severed parcel, generally, a riparian water user must share the water with the other riparian users. Riparian rights may be used to provide additional flow from use of ground water, or other "foreign" water to the natural stream system. An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, riparian rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, appropriative have been required to share a permit and receive from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system. Statements of Water Division and that must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with respect throughout. The filing of a statement (1) provides a record of water use, (2) enables the State to verify such users, (3) provides a means for determining

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. On the right side, there is a vertical margin line, creating a narrow right margin. The paper appears slightly aged or off-white.

Water is delivered to Tuolumne Utility District.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

I declare that the information in this report is true to the best of my knowledge and belief.

I understand that it may be necessary to document the water savings claimed in "F," above if credit under Water Code sections 1010 and 1011 is sought in the future.

I have data to support the above surface water use reductions due to conjunctive use efforts. YES ☐ NO ☐ (affirm)

b. If credit toward use under a claimed pre 1914 appropriative right through substitution of groundwater in lieu of appropriated water is claimed under section 1011.5 of the Water Code, please show the amounts of groundwater used:

a. Are you now using groundwater in lieu of surface water? YES ☐ NO ☐

3. Conjunctive use of surface water and groundwater

I have data to support the above surface water use reductions due to wastewater reclamation. YES ☐ NO ☐ (affirm)

b. If credit toward use under a claimed pre 1914 appropriative water right through substitution of reclaimed water, desalinated water or polluted water in lieu of appropriated water is claimed under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of reclaimed water used:

a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES ☐ NO ☐

2. Water quality and wastewater reclamation
